

TEST PLAN

Inam Restaurant Website Testing (PythonAnywhere Hosted Application)

1. Test Plan Identification

Field	Details
Test Plan ID	TP_INAM_001
Project Name	Inam Restaurant Website Testing
Application Under Test (AUT)	Inam Restaurant Web Application
Document Version	1.0
Prepared By	Inam Khan (Reg No: 12303473)
Reviewed By	Inam Khan (Reg No: 12303473)
Approved By	Inam Khan (Reg No: 12303473)
Date	21/05/2026

2. Introduction

Objective

The objective of this test plan is to validate that the Inam Restaurant website functions correctly, securely, reliably, and efficiently for end users. The testing ensures a smooth user experience across all major modules including authentication, menu browsing by category, gallery, contact, and overall site usability, performance and security.

Scope

This test plan covers testing of the following modules:

- User Login / Logout
- Home Page & Banner Carousel
- Navigation Menu
- Menu Categories (Biryani, Pizza, Burgers, Snacks, Desserts, Drinks)
- Product / Item Listing inside each category
- Gallery Page
- Contact Page
- Footer & Social Media Links
- Responsive / Cross-Browser behaviour
- Performance (page load, image size, Lighthouse score)

- Security (HTTPS, CSRF, SQL Injection, DEBUG mode, Admin panel)
-

3. Test Items

Item	Description
Application Under Test	Inam Restaurant Website
Platform	Web Application (Django on PythonAnywhere)
Browser Support	Chrome, Firefox, Edge
Devices	Desktop, Laptop, Tablet, Mobile
Modules to be Tested	Authentication, Menu, Categories, Gallery, Contact, Footer
Type of Testing	Functional, UI/UX, Compatibility, Security, Performance

4. Features to be Tested

Authentication Module

- User Login
- Invalid credentials handling
- Empty field validation
- Session Management
- Logout

Home Page & Navigation

- Banner carousel auto-slide
- Navigation menu links
- Footer links
- Page loading

Menu Categories

- Biryani category
- Pizza category
- Burgers category
- Snacks category
- Desserts category
- Drinks category

Gallery Page

- Image loading
- Image quality
- Layout

Contact Page

- Contact information display
- Contact form (if available)
- Social media links

UI / UX

- Responsive design (Desktop / Tablet / Mobile)
- Cross-browser compatibility
- Content correctness (titles, spelling)
- Broken images / console errors

Performance

- Lighthouse audit (Performance, Accessibility, SEO, Best Practices)
- Page load time
- Image optimization

Security

- HTTPS enforcement
- SQL Injection on login
- Invalid URL / 404 handling
- Django DEBUG mode
- Admin panel exposure
- CSRF token verification
- Weak password handling
- Session expiry after logout
- Security headers

5. Features Not to be Tested

- PythonAnywhere server infrastructure
- Database performance tuning
- Internal Django admin portal deep testing
- Third-party CDN behaviour

- Email server / SMTP configuration
-

6. Test Approach

The testing approach is primarily Manual Testing supported by browser tools.

Manual Testing

Manual testing will be performed for:

- Exploratory testing
- UI validation
- User experience testing
- Ad-hoc testing

Tool-Assisted Testing

Browser tools will be used for:

- Chrome DevTools (Network, Console, Lighthouse)
- Responsive device emulation
- Page source inspection (CSRF token check)
- securityheaders.com for header scan

Types of Testing

Functional Testing

To validate application features (login, menu navigation, category pages) against expected behaviour.

UI / UX Testing

To validate look-and-feel, content correctness, and usability of the site.

Compatibility Testing

To ensure the application works correctly across Chrome, Firefox and Edge browsers and on Desktop, Tablet and Mobile viewports.

Performance Testing

To validate page load times, image weight and overall Lighthouse score.

Security Testing

To identify vulnerabilities such as exposed debug pages, missing CSRF tokens, SQL injection susceptibility, and weak transport security.

7. Test Environment

Environment	Configuration
OS	Windows 11
Browsers	Chrome, Firefox, Edge
RAM	8 GB Minimum
Processor	Intel i5 or above
Internet	High-Speed Broadband
Database	SQLite (Django default on PythonAnywhere)
Hosting	PythonAnywhere
Test URL	https://inam0980.pythonanywhere.com/

8. Entry Criteria

Testing will start only after:

- Website is deployed and accessible at the test URL
 - Test environment (browser / DevTools) is ready
 - Test cases are prepared and reviewed
 - Smoke test (home page loads) is successful
-

9. Exit Criteria

Testing will be completed when:

- All planned 45 test cases are executed
 - Critical defects (DEBUG mode, CSRF) are fixed
 - No blocker defects remain open
 - Test execution status reaches 95% or above
 - Test summary report is prepared
-

10. Test Deliverables

The following deliverables will be prepared during the testing lifecycle:

- Test Plan (this document)
- Test Scenarios
- Test Cases (Inam_Restaurant_TestCases.xlsx)
- Defect Reports (Inam_Restaurant_BugReports.xlsx)
- Daily Status Reports
- Test Execution Reports
- Test Summary Report

11. Roles and Responsibilities

All testing roles in this project are handled solely by Inam Khan (Reg No: 12303473).

Role	Responsibility	Assigned To
Test Manager	Planning and monitoring	Inam Khan (12303473)
Test Lead	Test execution management	Inam Khan (12303473)
Test Engineer	Test case creation and execution	Inam Khan (12303473)
Automation Engineer	Automation scripting (if any)	Inam Khan (12303473)
Developer	Defect fixing	Inam Khan (12303473)
Business Analyst	Requirement clarification	Inam Khan (12303473)

12. Test Schedule

Activity	Start Date	End Date
Test Planning	20/05/2026	20/05/2026
Test Case Preparation	20/05/2026	20/05/2026
Environment Setup	20/05/2026	20/05/2026
Test Execution	21/05/2026	21/05/2026
Defect Retesting	22/05/2026	22/05/2026
Regression Testing	22/05/2026	22/05/2026
Test Closure	22/05/2026	22/05/2026

13. Defect Management Process

The defects identified during testing are logged in the Bug Report Excel sheet (

Defect Lifecycle

1. New
2. Assigned
3. Open
4. Fixed
5. Retest
6. Closed
7. Reopened

14. Risks and Mitigation

Risk	Impact	Mitigation
Single-tester project	Limited review coverage	Self-review at each stage
PythonAnywhere downtime	Testing blocked	Retry / schedule during stable hours
DEBUG mode exposed	Critical security risk	Immediately turn DEBUG=False
Missing CSRF tokens	Critical security risk	Add {% csrf_token %} in all forms
Large image sizes	Poor performance score	Compress images / convert to WebP
Browser cache during retest	False positives	Disable cache in DevTools

15. Tools Used

Purpose	Tool
Test Management	MS Excel
Manual Testing	Web Browser (Chrome / Firefox / Edge)
Performance Testing	Chrome Lighthouse, DevTools
Security Testing	Browser DevTools, securityheaders.com
Defect Tracking	MS Excel (Bug Reports sheet)
Documentation	MS Word / Excel

16. Approval Section
