

TEST SUMMARY REPORT

Inam Restaurant Website Testing (PythonAnywhere Hosted Application)

1. Document Identification

Field	Details
Report ID	TSR_INAM_001
Project Name	Inam Restaurant Website Testing
Application Under Test	https://inam0980.pythonanywhere.com/
Document Version	1.0
Prepared By	Inam Khan (Reg No: 12303473)
Reviewed By	Inam Khan (Reg No: 12303473)
Approved By	Inam Khan (Reg No: 12303473)
Report Date	22/05/2026
Test Period	20/05/2026 to 22/05/2026

2. Executive Summary

Manual testing of the Inam Restaurant website was carried out over a three-day cycle covering Functional, UI/UX, Performance and Security areas. A total of 45 test cases were executed against 42 documented requirements. The application passed the majority of the functional and UI tests; however, two CRITICAL security defects and three Performance issues were identified that must be addressed before release.

Overall Test Execution Status:

39 of 45 test cases PASSED (86.67% pass rate). 6 test cases FAILED, resulting in 6 logged defects (2 Critical, 1 High, 2 Medium, 1 Low). Exit criteria of 95% pass rate has NOT been met because of the critical security defects.

3. Test Objective

The objective of this testing cycle was to validate that the Inam Restaurant website functions correctly, looks good across devices, performs well, and is secure for end users. The focus modules were authentication, menu browsing, gallery, contact, and overall site quality.

4. Scope of Testing

In Scope

- User Login / Logout flows
- Home Page banner and navigation
- Six Menu Categories (Biryani, Pizza, Burgers, Snacks, Desserts, Drinks)
- Gallery Page
- Contact Page
- Footer and Social Media Links
- Responsive design on Desktop / Tablet / Mobile viewports
- Cross-Browser compatibility (Chrome, Firefox, Edge)
- Performance (Lighthouse audit, page load time, image weight)
- Security (HTTPS, SQL injection, CSRF, DEBUG mode, admin exposure)

Out of Scope

- PythonAnywhere server infrastructure
- Internal Django admin portal deep testing
- Database performance tuning
- Third-party CDN behaviour
- Email server / SMTP configuration

5. Test Environment

Component	Details
OS	Windows 11
Browsers	Chrome (primary), Firefox, Edge
Devices Emulated	Desktop, Tablet (iPad), Mobile (iPhone 12, Pixel 5)
Tools	Chrome DevTools, Lighthouse, securityheaders.com
Network	Broadband
Test URL	https://inam0980.pythonanywhere.com/

6. Test Execution Summary

Overall Test Case Statistics:

Metric	Value
Total Test Cases Planned	45
Total Test Cases Executed	45
Test Cases Passed	39
Test Cases Failed	6
Test Cases Blocked	0
Test Cases Not Executed	0
Execution %	100%
Pass %	86.67%
Fail %	13.33%

Test Cases Breakdown by Type:

Test Type	Total	Passed	Failed	Pass %
Functional	18	17	1	94.44%
UI / UX	9	9	0	100%
Performance	7	4	3	57.14%
Security	11	9	2	81.81%
TOTAL	45	39	6	86.67%

7. Defect Summary

Defects logged by Severity:

Severity	Count	% of Total
Critical	2	33.33%
High	1	16.67%
Medium	2	33.33%
Low	1	16.67%
TOTAL	6	100%

Defect Status:

Status	Count
Open	6
In Progress	0
Fixed	0
Closed	0
Reopened	0

Detailed Defect List:

Bug ID	Module	Severity	Title	Status
BUG-001	Footer / Social	Low	Social media links open in same tab	Open
BUG-002	Home (Lighthouse)	Medium	Lighthouse Performance score is 68 (below 70)	Open
BUG-003	Home (Load Time)	Medium	Page load time ~5 seconds (target < 3s)	Open
BUG-004	Menu / Images	High	Images ~2000 KB each (not optimized)	Open
BUG-005	URL / Routing	Critical	Invalid URL exposes Django debug error page	Open
BUG-006	Forms / Security	Critical	CSRF token missing in forms	Open

8. Test Coverage (Requirement Traceability)

Metric	Value
Total Requirements	42
Requirements Mapped to Test Cases	42 (100%)
Requirements Passed	36
Requirements Failed	6
Requirement Pass %	85.71%
Open Linked Defects	6

Failed Requirements:

Req ID	Description	Test Case	Defect ID
REQ-018	Social links shall open in new tab	FUN-018	BUG-001
REQ-028	Lighthouse Performance score >= 70	PER-001	BUG-002
REQ-032	Page load time under 3 seconds	PER-005	BUG-003
REQ-033	Images shall be under ~500 KB	PER-007	BUG-004
REQ-036	Invalid URL shall return friendly 404	SEC-004	BUG-005
REQ-039	Forms shall include CSRF token	SEC-008	BUG-006

9. Key Observations

- All 6 menu category pages (Biryani, Pizza, Burgers, Snacks, Desserts, Drinks) loaded and rendered correctly.
- Authentication flow (valid login, invalid password, empty fields, logout) works as expected.
- Responsive design works well on Desktop, Tablet and Mobile viewports.
- Application is served over HTTPS by default (PythonAnywhere hosting).
- Login form is NOT vulnerable to basic SQL injection attempt (' OR '1'='1').

- Two CRITICAL security defects identified: Django DEBUG mode is ON in production (exposes source code) and CSRF tokens are missing from forms.
- Performance score is below acceptable threshold mainly because individual images are around 2 MB in size.
- Biryani category title contains the full description text instead of a short title (UI issue, captured separately).

10. Risks & Issues Encountered During Testing

Risk / Issue	Impact	Action Taken
Critical security defects (DEBUG on, no CSRF)	Release blocker	Reported as Critical; recommend fix before go-live
Heavy images causing slow load	Poor UX	Recommended compression / WebP conversion
Single-tester project	Limited review	Self-review at each stage

11. Recommendations

Immediate (before release):

- BUG-005: Set DEBUG = False in Django settings.py and configure ALLOWED_HOSTS. Add a custom 404 template.
- BUG-006: Add {% csrf_token %} to every <form> in Django templates.

High priority (within next sprint):

- BUG-004: Compress all menu/gallery images (target < 500 KB; prefer WebP format with lazy loading).
- BUG-002 / BUG-003: Re-run Lighthouse after image optimization — performance and load time should improve automatically.

Medium / Low priority:

- BUG-001: Add target="_blank" rel="noopener noreferrer" to social media <a> tags.
- Fix the Biryani category title (currently a full description).
- Consider adding meta description / Open Graph tags for better SEO.

12. Conclusion

The Inam Restaurant website is broadly functional and visually acceptable across browsers and devices. However, due to two CRITICAL security defects (DEBUG mode exposure and missing CSRF tokens) and significant performance issues caused by heavy images, the application does NOT meet the 95% exit criteria defined in the Test Plan.

Recommendation:

DO NOT release to wider audience until the two Critical security defects are fixed. The performance and UI defects can be addressed in a follow-up patch. After fixes, a regression cycle should be executed.

Sign-off Status:

CONDITIONAL — pending fixes for BUG-005 and BUG-006.

13. Deliverables Reference

- Test Plan: TEST PLAN-InamRestaurant.docx
- Test Cases: Inam_Restaurant_TestCases.xlsx (45 cases)
- Bug Reports: Inam_Restaurant_BugReports.xlsx (6 bugs)
- RTM: Inam_Restaurant_RTM.xlsx (42 requirements)
- Test Summary Report: this document
